# Aleksa Radulovic

## Software Engineer

Hello everyone, my name is Aleksa and I'm a Middle Software Engineer with 4+ years of experience of commercial development. My main direction is frontend development in MERN stack, this is my passion!

My stack:

- Frontend: Next.js, React.js, TypeScript, Webpack, CSS, SCSS, HTML, HTML5, Canvas, WebAssembly, Javascript, Jest;
- Backend: Node.js, Express.js
- DevOps: Docker, Docker Compose;
- Patterns and approaches: GoF, SOLID, DDD, TDD;

Skills:

- Design and development responsive interfaces;
- Writing clean and scalable code;
- SPA, SSR, Universal apps;

## Experience

### Jan 2023 - Present

M Lab Studio, Remote

### Software Engineer

I am working for this company as a full stack developer. For the first 7-9 months, I worked part-time, and afterwards, I transitioned to full-time. My colleagues and I have been working on interesting projects, and my part involves using React.js, TypeScript, and Next.js, alongside the knowledge I had previously gained. You can find my projects attached to my LinkedIn profile under each position.

- React.js, Next.js, Node.js (Express)
- Vanilla JS & TypeScript, Docker experience
- Working with states (useState, useReducer)
- Working with useEffect, useRef etc...
- Caching (useMemo & useCallback hooks), TanStack react query
- React hook form
- Context API (useContext hook) / Redux (Redux Toolkit)
- Styled components & css modules
- Material UI
- Git (gitlab, github)

### Jan 2021 - Sep 2023

PopArt Studio, Novi Sad

### Frontend Developer

First I had internship for 3 months then I got an offer to get a job, it involves creating WordPress websites, WooCommerce stores, custom JavaScript animations, GSAP animations, calculators, good experience with google maps api, creating re-usable code for future projects (improving existing WP themes, adding various types of helper functions etc...), good understanding of git (working in team on same project at once, resolving conflicts, creating pull requests etc...), hosting finished projects (cPanel & server configurations), using project management tools (clickup, infinity etc...) familiar with agile methodology, close cooperation with design and project management team. You can find my projects attached on my LinkedIn profile under every position.

- HTML
- CSS (SASS)
- JavaScript / TypeScript (es6+ features, asynchronous handling - ajax, fetch etc...)
- Bundlers configuration (webpack, vite, parcel...)
- Wordpress (custom themes with acf-blocks, templates), working with Custom Post Types, Advanced Custom Field plugin, have some experience with WooCommerce
- Git (gitlab, github)
- Hosting services (cPanel & server configurations)
- Project management tools (clickup, infinity etc...), planning & organization of tasks (writing technical documentations)
